

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-57 (Cancelled).

58. (Previously Presented) An automated method for providing a line of credit in a prepaid card account, the method comprising:

receiving, at a credit processing system, a plurality of deposit transactions depositing funds into a first account linked to a prepaid card with a first account identifier, wherein a history of the funds deposited into the first account are used to establish a credit line for the prepaid card;

establishing the credit line for the prepaid card to satisfy at least a portion of the purchase transaction, wherein the credit line is based solely upon transaction information for the first account as identified by the prepaid card, and wherein the transaction information includes at least the plurality of deposit transactions into the first account; and

authorizing, by the credit processing system, the purchase transaction in response to a balance of funds in the first account being:

- (i) greater than or equal to an amount of the purchase transaction and debiting the first account for the amount of the transaction, and
- (ii) less than the amount of the purchase transaction, debiting the first account for the balance of the funds in the first account and utilizing the credit line that was established in response to receiving the request for authorization to satisfy an amount equal to the amount of the purchase transaction less the balance of funds in the first account.

59. (Previously Presented) The method according to claim 58, further comprising:
- receiving, in addition to the plurality of deposit transactions, at least one subsequent deposit transaction having additional funds associated with the first account;
 - applying a loan repayment portion of the additional funds to at least partial repayment of the loan and transferring a remaining portion of the additional funds to the first account; and
 - wherein the transaction information includes loan granting and loan repayment information.
60. (Previously Presented) The method according to claim 58, further comprising:
- determining a second credit limit amount associated with a second account independent of the first account in response to the transaction information;
 - receiving a request for authorization of a second purchase transaction associated with the second account; and
 - authorizing the second purchase transaction when the second credit limit amount is greater than or equal to the second purchase transaction.
61. (Previously Presented) The method according to claim 58, wherein the preceding steps are performed by a first financial institution and the subsequent steps are performed by a second financial institution independent of the first financial institution, the method at the second financial institution comprising:
- determining a second credit limit amount associated with a second account independent of the first account in response to the transaction information received from the first financial institution;
 - receiving a request for authorization of a second purchase transaction associated with the second account; and
 - authorizing the second purchase transaction when the second credit limit amount is greater than or equal to the second purchase transaction.

62. (Previously Presented) The method according to claim 58, further comprising:
- receiving a plurality of deposit transactions depositing funds into the first account;
 - authorizing each of a plurality of purchase transactions when the funds within the first account are greater than or equal to each of the plurality of purchase transactions; and
 - including the plurality of deposit transactions and purchase transactions in the transaction information, and wherein the first credit limit is determined to be zero upon reception of a first deposit transaction and increases the credit limit in response to subsequent deposit transactions.
63. (Previously Presented) The method according to claim 62, wherein the deposit transactions include bills and coins as part of a cash deposit received at an automated currency processor using the prepaid card having information identifying the first account.

64. (Previously Presented) A computer readable storage medium containing programming instructions for providing a line of credit in a prepaid card account, the programming instructions comprising:

receiving, at a credit processing system, a plurality of deposit transactions depositing funds into a first account linked to a prepaid card with a first account identifier

receiving, at a credit processing system, a plurality of deposit transactions depositing funds into a first account linked to a prepaid card with a first account identifier, wherein a history of the funds deposited into the first account are used to establish a credit line for the prepaid card;

establishing the credit line for the prepaid card to satisfy at least a portion of the purchase transaction, wherein the credit line is based solely upon transaction information for the first account as identified by the prepaid card, and wherein the transaction information includes at least the plurality of deposit transactions into the first account; and

authorizing, by the credit processing system, the purchase transaction in response to a balance of funds in the first account being:

(i) greater than or equal to an amount of the purchase transaction and debiting the first account for the amount of the transaction, and

(ii) less than the amount of the purchase transaction, debiting the first account for the balance of the funds in the first account and utilizing the credit line that was established in response to receiving the request for authorization to satisfy an amount equal to the amount of the purchase transaction less the balance of funds in the first account.

65. (Previously Presented) The computer readable storage medium according to claim 64, further comprising programming instructions for:

receiving, in addition to the plurality of deposit transactions, at least one subsequent deposit transaction having additional funds associated with the first account;

applying a loan repayment portion of the additional funds to at least partial repayment of the loan and transferring a remaining portion of the additional funds to the first account; and

wherein the transaction information includes loan granting and loan repayment information.

66. (Previously Presented) The computer readable storage medium according to claim 64, further comprising programming instructions for:

determining a second credit limit amount associated with a second account independent of the first account in response to the transaction information;

receiving a request for authorization of a second purchase transaction associated with the second account; and

authorizing the second purchase transaction when the second credit limit amount is greater than or equal to the second purchase transaction.

67. (Previously Presented) The computer readable storage medium according to claim 64, wherein the preceding programming instructions are performed by a first financial institution and the subsequent programming instructions are performed by a second financial institution independent of the first financial institution, the programming instructions performed at the second financial institution comprising:

determining a second credit limit amount associated with a second account independent of the first account in response to the transaction information received from the first financial institution;

receiving a request for authorization of a second purchase transaction associated with the second account; and

authorizing the second purchase transaction when the second credit limit amount is greater than or equal to the second purchase transaction.

68. (Previously Presented) The computer readable storage medium according to claim 64, further comprising:

receiving a plurality of deposit transactions depositing funds into the first account;

authorizing each of a plurality of purchase transactions when the funds within the first account are greater than or equal to each of the plurality of purchase transactions; and

including the plurality of deposit transactions and purchase transactions in the transaction information, and wherein the first credit limit is determined to be zero upon reception of a first deposit transaction and increases the credit limit in response to subsequent deposit transactions.

69. (Previously Presented) The computer readable storage medium according to claim 68, wherein the deposit transactions include bills and coins as part of a cash deposit received at an automated currency processor using the prepaid card having information identifying the first account.

70. (Previously Presented) A credit processing system for providing a line of credit in a prepaid card account, the system comprising:

means for receiving, at a credit processing system, a plurality of deposit transactions depositing funds into a first account linked to a prepaid card with a first account identifier;

receiving, at a credit processing system, a plurality of deposit transactions depositing funds into a first account linked to a prepaid card with a first account identifier, wherein a history of the funds deposited into the first account are used to establish a credit line for the prepaid card;

means for establishing the credit line for the prepaid card to satisfy at least a portion of the purchase transaction, wherein the credit line is based solely upon transaction information for the first account as identified by the prepaid card, and wherein the transaction information includes at least the plurality of deposit transactions into the first account; and

means for authorizing, by the credit processing system, the purchase transaction in response to a balance of funds in the first account being:

(i) greater than or equal to an amount of the purchase transaction and debiting the first account for the amount of the transaction, and

(ii) less than the amount of the purchase transaction, debiting the first account for the balance of the funds in the first account and utilizing the credit line that was established in response to receiving the request for authorization to satisfy an amount equal to the amount of the purchase transaction less the balance of funds in the first account.

71. (Previously Presented) The credit processing system according to claim 70, further comprising:

means for receiving, in addition to the plurality of deposit transactions, at least one subsequent deposit transaction having additional funds associated with the first account;

means for applying a loan repayment portion of the additional funds to at least partial repayment of the loan and transferring a remaining portion of the additional funds to the first account; and

wherein the transaction information includes loan granting and loan repayment information.

72. (Previously Presented) The credit processing system according to claim 70, further comprising:

means for determining a second credit limit amount associated with a second account independent of the first account in response to the transaction information;

means for receiving a request for authorization of a second purchase transaction associated with the second account; and

means for authorizing the second purchase transaction when the second credit limit amount is greater than or equal to the second purchase transaction.

73. (Previously Presented) The credit processing system according to claim 70, wherein the preceding means are performed by a first financial institution and the subsequent means are performed by a second financial institution independent of the first financial institution, the second financial institution comprising:

means for determining a second credit limit amount associated with a second account independent of the first account in response to the transaction information received from the first financial institution;

means for receiving a request for authorization of a second purchase transaction associated with the second account; and

means for authorizing the second purchase transaction when the second credit limit amount is greater than or equal to the second purchase transaction.

74. (Previously Presented) The credit processing system according to claim 70, further comprising:

means for receiving a plurality of deposit transactions depositing funds into the first account;

means for authorizing each of a plurality of purchase transactions when the funds within the first account are greater than or equal to each of the plurality of purchase transactions; and

including the plurality of deposit transactions and purchase transactions in the transaction information, and wherein the first credit limit is determined to be zero upon reception of a first deposit transaction and increases the credit limit in response to subsequent deposit transactions.

75. (Previously Presented) The credit processing system according to claim 70, wherein the deposit transactions include bills and coins as part of a cash deposit received at an automated currency processor using the prepaid card having information identifying the first account.

76. (Withdrawn-currently amended) The method according to claim [[58]]83, wherein the establishing the credit line further includes a point of sale classification of a geographical location for the purchase transaction.

77. (Withdrawn) The method according to claim 76, wherein the establishing the credit line further includes a transaction classification of a type of goods or services requested for purchase.

78. (Withdrawn) The method according to claim 77, wherein the establishing the credit line further includes a transaction classification of the type of goods or services requested for purchase are regularly purchased by the consumer:

79. (Withdrawn) The method according to claim 78, wherein the establishing the credit line further includes employment validation:

80. (Withdrawn-currently amended) The method according to claim [[58]]83, wherein the establishing the credit line further includes extending credit even though an account holder associated with the first account has no bank account.

81. (Withdrawn) The method according to claim 80, wherein the establishing the credit line further includes extending credit even though an account holder associated with the first account has no verifiable income.

82. (Withdrawn) The method according to claim 81, wherein the establishing the credit line further includes extending credit even though an account holder associated with the first account has no permanent address.

83. (Previously Presented) The method according to claim 58, wherein the establishing the credit line further includes establishing the credit line at a time of a request for authorization of a purchase transaction.

84. (Withdrawn-currently amended) The method according to claim [[58]]83, wherein the establishing the credit line further includes establishing the credit line based on a last deposit.

85. (Withdrawn-currently amended) The method according to claim [[58]]83, wherein the establishing the credit line further includes extending credit based on a next anticipated deposit.
